

Online Professional Development for CSU Employees

Did you know Colorado State University now offers more than 10 bachelor's degrees, 30+ master's degrees, and 35+ graduate certificates – all fully online? Use your employee study privilege to continue your education online to earn career-building credentials.

Same CSU education – just online

Earning a degree or certificate doesn't just provide opportunities for professional development. It opens doors to impactful learning experiences, cutting-edge research, and thought-provoking academic collaboration. The only difference between CSU's online and on-campus programs is the setting. When you become an online student with CSU, you get:

- The same outstanding faculty
- The same education and academic standards
- The same services and support

Featured online bachelor's programs

- Agricultural Business
- Anthropology
- Computer Science
- Economics
- Horticulture
- Journalism and Media Communication

Featured online graduate programs

- Adult Education and Training
- Biomedical Engineering
- Business Administration
- Computer Science
- Industrial/Organizational Psychology
- Tourism Management

Not sure if a degree or graduate certificate is the right choice for you? Start with a single course first. You can enroll in many courses without being admitted into a program.

Being an online student has so many advantages, especially at Colorado State University. The instructors really understand that most of their students are working professionals. I was able to work full-time, 40 or 50 hours a week, and still come home and complete the courses.

– Kristin D., Industrial/Organizational Psychology
